

TA Recruitment System V2 - User Manual

I. System Overview

The TA Recruitment System V2 is a Java Swing-based graphical interface application for managing the teaching assistant (TA) recruitment process. The system supports three roles: **TA (Applicant)**, **MO (Recruiter/Module Leader)**, and **ADMIN (Administrator)**.

II. System Startup

2.1 How to Run

1. Ensure you have Java Development Kit (JDK) 8 or later installed
2. Run the following commands in the **V2** project directory:

```
# Compile the project
javac -d bin -sourcepath src src/gui/MainFrame.java

# Run the program
java -cp bin gui.MainFrame
```

2.2 How to Run TestProgram

1. Enter the V2 directory

```
cd V2
```

2. Compile TestProfile.java and its dependencies We specify the source code directory as src and use UTF-8 encoding to support Chinese:

```
javac -encoding UTF-8 -cp src src/TestProfile.java
```

3. Run the compiled program

```
java -cp src TestProfile
```

2.3 Welcome Screen

After starting the program, the welcome screen is displayed first:

- Top shows system title "TA Recruitment System V2"

- Top right shows current login status (initially "Not Logged In")
 - Bottom has "Logout" button (disabled when not logged in) and "Exit" button
-

III. How to View Javadoc Files

To view the Javadoc documentation, follow these steps:

1. In the file list on the left side of Trae, locate `V2/docs/javadoc/index.html`.
 2. Right-click on the file.
 3. Select "Reveal in File Explorer".
 4. In the Windows File Explorer window that pops up, double-click on `index.html` again. This will open the beautifully formatted Javadoc page in your computer's default browser (such as Chrome or Edge).
-

IV. Account Registration and Login

4.1 Register a New Account

1. Click the **"Register"** button in the login window
2. Fill in registration information:
 - **Student ID:** Student ID (unique identifier)
 - **Password:** Password
 - **Confirm Password:** Confirm password
 - **Name:** Full name
 - **Role:** Select role (TA/MO/ADMIN)
3. Click the **"Register"** button to complete registration
4. After successful registration, a prompt will appear and you will automatically return to the login screen

4.2 Login to the System

- 1. Enter **Student ID** and **Password** on the login screen
- 2. Click the **"Login"** button
- 3. System verifies account password:
 - Verification successful: Enter the corresponding dashboard based on role
 - Verification failed: Error prompt appears

4.3 Find Existing Account Password

Since the system uses CSV files to store data, you can directly view the data files:

- 1. Open the `users.csv` file in the project directory
- 2. File format: `studentId,name,password,email,major,role,intention,experience,skills`
- 3. Example:

```
2023001,Zhang San,123456,zhangsan@example.com,Computer Science,TA,,,
2023002,Li Si,123456,lisi@example.com,Software Engineering,TA,,,
M0001,Prof.Li,mo123456,professor@example.com,Computer Science,MO,,,
ADMIN001,Admin,admin123456,admin@example.com,Administration,ADMIN,,,
```

Note: For security reasons, it is recommended to change passwords regularly.

V. Role Function Details

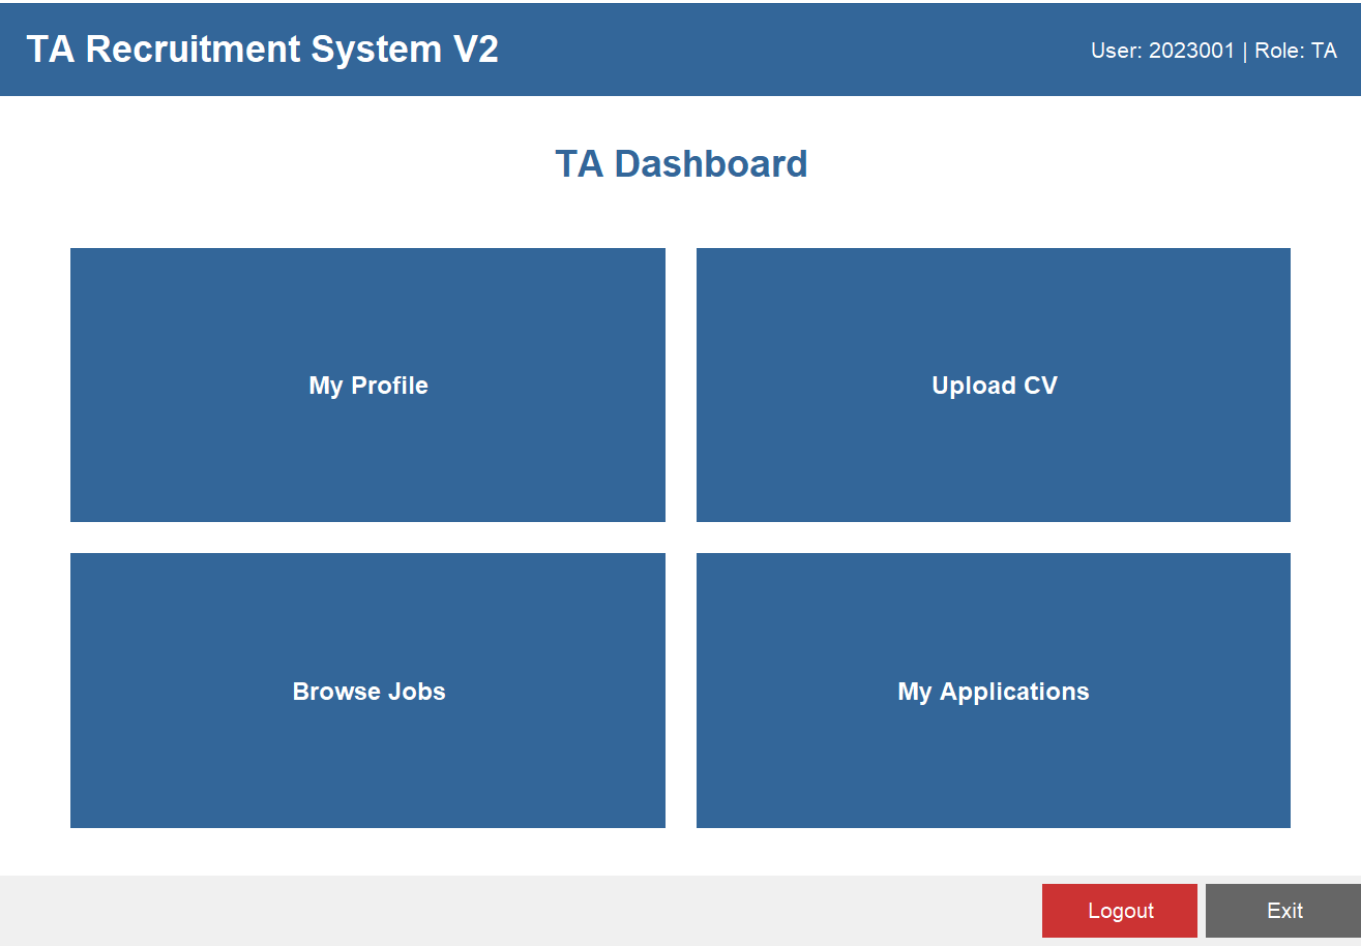

5.1 TA (Teaching Assistant Applicant)

The TA role is mainly used to apply for TA positions and view application status.

5.1.1 TA Dashboard

After logging in, enter the TA dashboard, which includes the following function buttons:

- **My Profile:** View/Edit personal information
- **Upload CV:** Edit personal CV
- **Browse Jobs:** Browse and apply for positions
- **My Applications:** View application records

5.1.2 Personal Information Management

1. Click "**My Profile**" to enter the personal information page
2. Editable fields:
 - Email: Email address
 - Major: Major
3. Click "**Save Changes**" to save modifications
4. Click "**Back**" to return to TA dashboard

Personal Information

User ID:	2023001
Name:	Zhang San
Email:	zhangsan111@example.com
Major:	Computer Science
Role:	TA

Save Changes

Back

5.1.3 Edit CV

1. Click **"Upload CV"** to enter the CV editing page
2. Fill in CV information:
 - Intention: Application intention
 - Experience: Relevant experience
 - Skills: Skills and strengths
3. Click **"Save CV"** to save changes (information will be saved to the users.csv file)

6.1 Return to Main Menu

All function pages have a "**Back**" button, click to return to the corresponding role dashboard.

6.2 Logout of the System

1. Click the "**Logout**" button at the bottom
2. The system clears the current login status and returns to the welcome screen

6.3 Exit the Program

Click the "**Exit**" button at the bottom to close the program.

6.4 Message Prompts

The system uses a unified message dialog:

- **Success:** Operation success prompt (green)
- **Warning:** Warning prompt (yellow)
- **Error:** Error prompt (red)
- **Info:** Information prompt (blue)

VII. Data File Description

The system uses CSV files to store data, files are located in the project root directory:

File Name	Purpose	Field Description
<code>users.csv</code>	User information	studentId, name, password, email, major, role, intention, experience, skills
<code>jobs.csv</code>	Position information	jobId, title, hours, moduleId, requirements, description
<code>modules.csv</code>	Course modules	moduleId, moduleName, mold
<code>applications.csv</code>	Application records	studentId, jobId, status, applyDate

VIII. Frequently Asked Questions

Q1: What if I forget my password?

A: Since the system does not have a password reset function, you need to manually modify the password field in the `users.csv` file.

Q2: MO can't see any course modules?

A: MO can only manage course modules they are responsible for. Please contact the administrator to add courses you are responsible for in `modules.csv`.

Q3: TA can't see any positions?

A: Positions are published by MO, please contact the relevant MO to publish positions.

Q4: Application status always shows PENDING?

A: Please contact the corresponding MO to review your application.

IX. Shortcuts

Shortcut	Function
Alt + F4	Close window
Enter	Confirm button (some buttons)

X. Technical Support

If you encounter system problems, please contact the system administrator.
